

Subject: Request for No Styrofoam Packaging

Hello,

I am not sure where to send this: if this is not the most appropriate address, please forward it to a more applicable contact.

I just opened my purchase offrom your company and was disappointed to see Styrofoam packaging material included.

I am very concerned about the excessive usage of Styrofoam. Styrofoam in a landfill takes over 500 years to degrade. Even when Styrofoam is recycled it is harmful to the environment due to the chemicals and processes used to create it. I take the three Rs of sustainability – Reduce, Re-use, Recycle – seriously. To that end, I plan to take packaging choices into account when making a purchase, and to ask retail outlets to use more sustainable materials.

Please consider using a more sustainable packaging material by making the switch to recycled paper padding, inflated plastic pillows (not ideal, but at least easier to recycle), or starch-based chips.

Thank you,
